SUBJECT INDEX TO VOLUMES 30 AND 31

CATEGORIES

Archaeometallurgy
Automatic Image Analysis
Book Review
Characterization Techniques
Crystallography
Diffusion Phenomena
Editorials
Electron Microscopy
Failure Analysis
Heat Treatment; Thermal Stability
Letters to the Editor
Mathematical Analysis, Modeling
Mechanical Behavior; Creep; Fatigue; Fracture

Metallographic Preparation
Metallographic Preparation, TEM
Microindentation Hardness
Microstructural Characterization: Composites
Microstructural Characterization: Metals, Metal Compounds
Microstructural Characterization: Nonmetals
Oxidation; Corrosion; Environmental Interactions
Phase Transformations
Quantitative Analysis
Recovery and Recrystallization
Surface Treatment; Thermal Stability
Welding; Joining; Solidification

Archaeometallurgy

Studies of Damascus Steel Blades: Part I—
 Experiments on Reconstructed Blades, 30:175
 Studies of Damascus Steel Blades: Part II—
 Destruction and Reformation of the Pattern, 30:187

Automatic Image Analysis

Assessment of Pearlite Banding Using Automatic
 Image Analysis: Application to Hydrogen-
 Induced Cracking, 31:143
 Automatic Assessment of a Two-Phase Structure in
 the Duplex Stainless-Steel SAF 2205, 31:155

Characterization Techniques

Depth Measurements of Short Cracks in Perspex
 with the Scanning Acoustic Microscope, 31:115
 Effect of Substructure on the Thermoelectric Power
 of Deformed Zr-Cr-Fe Sheet, 30:97
 Effects of Voltage Pulses on Precipitates During
 Scanning Tunneling Microscopy Studies, 31:77
 High-Resolution Electron Microscopy of Lead and
 Lead-Calcium Alloys, 30:217
 Microstructural Characterization by Secondary Ion
 Mass Spectrometry of (Alumina + Zirconia)
 Fiber/Glass Composites with and without a Tin
 Dioxide Interphase, 31:167
 Scanning Tunneling Microscopy Study of
 Precipitates in a Microalloyed Steel, 31:69

Crystallography

Convergent Beam Electron Diffraction Zone Axis

Pattern Maps from a Copper Single Crystal, 31:83
 Morphology of Zinc Deposited from Mixed Gas
 Streams at Reduced Pressures, 30:155
 Ordering Behaviors and Age-Hardening in
 $\text{Cu}_{0.5}\text{Au}_{0.5-x}\text{Ni}_x$ Alloys, 30:137

Diffusion Phenomena

Metallographic Investigation of DIGM in Fe-Ni
 System, 30:89

Electron Microscopy

Preparation of Fine Powders for Electron
 Microscopy Investigations, 31:33

Failure Analysis

A Metallurgical Examination of Failed Zirconium
 Alloy Autoclaves, 30:269
 Structural Failures: Causes, Prevention, and
 Misinterpretation, 31:19

Heat Treatment; Thermal Stability

The Application of Metallographic Techniques in
 the Study of Tempering of HSLA-100 Steel, 30:261
 The Effect of Cold Working and Annealing Practice
 on Earing in 3104 Al Alloy Sheet, 30:251

Mathematical Analysis, Modeling

Modeling Particle Size Distribution by the Weibull
 Distribution Function, 31:177
 Properties of a Two-Dimensional Poisson-Voronoi
 Tessellation: A Monte-Carlo Study, 31:55

- Spatial Correlations in Metal Structures and Their Analysis, II: The Covariance, 31:47
- Mechanical Behavior; Creep; Fatigue; Fracture*
- Influence of Microstructure on High-Cycle Fatigue Behavior of Austempered Ductile Cast Iron, 30:221
- Influence of High-Temperature Exposure on the Microstructure and Creep Resistance of IN-100 Superalloy, 30:3
- On Predicting the Temperature and Strain Rate Dependences of the Fracture Toughness to Plain Carbon Steels, 31:91
- Surface Roughness of Anisotropic Fracture Surfaces, 30:279
- Metallographic Preparation*
- A General Etchant for Revealing Prior-Austenite Grain Boundaries in Steels, 30:299
- A Useful Technique for Studying Graphite in Cast Iron, 31:209
- An Etching Technique for Primary Austenite Dendrites in Ductile Cast Iron, 31:127
- Automated Polishing Procedure for the Metallographic Preparation of High-Temperature Superconducting Ceramics, 3:71
- Preparing Flatter Specimens in Half the Steps, Half the Time, 30:61
- The Application of Metallographic Techniques in the Study of Tempering of HSLA-100 Steel, 30:261
- Preparation of Fine Powders for Electron Microscopy Investigations, 31:33
- Metallographic Preparation, TEM*
- Techniques for the Production of Thin Foils from the Interfacial Regions of Iron-Zinc Couples, 30:55
- Microindentation Hardness*
- A Comparison of Three Microindentation Hardness Scales at Low and Ultralow Loads, 30:287
- Microstructural Characterization: Composites*
- Distinguishing Between Chi and Sigma Phases in Duplex Stainless Steels Using Potentiostatic Etching, 31:185
- Metallography of Gamma Titanium Aluminides, 31:197
- Microstructural Characterization by Secondary Ion Mass Spectrometry of (Alumina + Zirconia) Fiber/Glass Composites with and without a Tin Dioxide Interphase, 31:167
- Overlapping of γ Precipitate Variants in Inconel 718, 31:191
- Microstructural Characterization: Metals, Metal Compounds*
- Assessment of Pearlite Banding Using Automatic Image Analysis: Application to Hydrogen-Induced Cracking, 31:143
- Characterization and Comparison of Microstructures in the Shaped-Charge Regime: Copper and Tantalum, 30:201
- Effect of Extended Recovery on the Recrystallization Characteristics of Flash-Annealed Strip Cast 3004 Aluminum Alloy, 30:113
- Effects of Pressure, Time, and Various Additives on the Crystallization of Graphite and $(\text{Fe}_{1-x}\text{Ni}_x)_3\text{C}$ Carbide in the Fe-Ni-C System, 30:107
- Effects of Si Content on the Microstructure of Modified-HP Austenitic Steels, 30:243
- High-Resolution Electron Microscopy of Lead and Lead-Calcium Alloys, 30:217
- Metallographic Investigation of DIGM in Fe-Ni System, 30:89
- Microstructural Characterization of Titanium Diboride, 31:39
- Microstructural Development in the Coarse-Grained, Heat-Affected Zone in Titanium-Vanadium Microalloyed HSLA Steels, 30:35
- Microstructural Examination of 2.25Cr-1Mo Steel Steam Pipes After Extended Service, 30:75
- Microstructural Features of a New Precipitation-Strengthened Cu-8Cr-4Nb Alloy, 31:133
- Ordering Behaviors and Age-Hardening in $\text{Cu}_{0.5}\text{Au}_{0.5-x}\text{Ni}_x$ Alloys, 30:137
- Precipitation in an As-Cast Pb-0.04wt.% Ca Alloy, 30:45
- Structures and Properties of a Rapidly Solidified Fe-19.1Ni-1.76Mn-0.73Ti Maraging Alloy, 31:99
- The Effect of Carbon Content on the Microstructure of an Experimental Heat-Resistant Steel, 31:3
- The Effect of Cold Working and Annealing Practice on Earing in 3104 Al Alloy Sheet, 30:251
- Microstructural Characterization: Nonmetals*
- Dielectric Properties of Li-Aluminates for Ceramic Breeder Materials, 30:127
- Microstructural Response to Controlled Accelerations During the Directional Solidification of Al-6 wt.% Si Alloys, 31:225
- Oxidation; Corrosion; Environmental Interactions*
- Oxidation of Fe-25Cr-4Al-Pd and Fe-25Cr-4Al-Ru Alloys, 30:235
- TEM Study of the Oxide-Metal Interface Formed During Corrosion of Zr-2.5wt.% Nb Pressure Tubing, 30:13
- Phase Transformations*
- Phase Transformations in Zn-Al-Cu Alloys, 31:217
- Quantitative Analysis*
- Quantitative Microstructural Analysis of Anisotropic Materials, 31:11
- Recovery and Recrystallization*
- Effect of Extended Recovery on the Recrystallization Characteristics of Flash-Annealed Strip Cast 3004 Aluminum Alloy, 30:113

Surface Treatment; Thermal Stability

Metallographic Preparation Technique for Hot-Dip Galvanized and Galvannealed Coatings on Steel, 31:107

Method for Metallographically Revealing Intermetallic Formation at Galfan/Steel Interfaces, 30:295

Welding; Joining; Solidification

Metallographic Analysis of Helium-Embrittlement Cracking of Repair Welds in Nuclear Reactor Tanks, 30:23

Microstructural Development in the Coarse-Grained, Heat-Affected Zone in Titanium-Vanadium Microalloyed HSLA Steels, 30:35

Weld Solidification and HAZ Liquation in a Metastable-Beta Titanium Alloy-Beta-21S, 30:147

Book Review

Surface Preparation and Microscopy of Metals, 31:183

Editorials, 30:1, 31:1

Letters to the Editor, 30:307
